

# Argentina Factsheet

A unique investment tool for Biodiversity Conservation and Climate Resilience

## ARGENTINA CARBON FUND USD25 Million (revolving fund)

### Conditions:

- Nature-based projects (NBS), Livestock and Forestry (ALM)
- Must be landowners
- Up to USD2 million (per project)
- Call for proposals 2025-2030

### Type of Credit:

- Sustainability linked Loan
- 2/3 years grace period
- 10 years loans
- 5% annual rate
- Specific KPIs for NBS or ALM

### Carbon Credits Issuance:

- High-Quality with BeZero rating BBB and up
- Insurance Coverage
- Sale from the Argentine Carbon Exchange (BACX)

### Impact:

- Local Communities
- 30x30 Forest Conservation

### GCX ACCELERATION

With USD25 million the GCX ACCELERATION FUND will direct institutional capital towards climate investments that can accelerate the transition to a net-zero economy and robust nature protection with state-of-the-art- technology for governance and transparency.

### Intended for conservation

ARGENTINA CARBON FUND will invest in strengthening climate resilience and ecosystems conservation as a mechanism to ensure nature protection with the newest satellite and artificial intelligence technology.

ARGENTINA CARBON FUND will stimulate innovation and identify nature based solutions to rapidly deploy capital quality investment. This Vehicle would be composed of actions towards conservation hectares. The valuation of each conserved hectare is estimated between 10 and 25 USD/tn.

These investments are in line with the certificates issued in the voluntary carbon market called "Nature Based Solutions".

In addition to meeting the guidelines of international treaties such as the Kunming-Montreal Biodiversity Treaty or Europe's Zero Deforestation. This vehicle could also function as a collateral/guarantee for other vehicles and would be an intangible asset for the shares it holds.

BACX would do the screening and due diligence of the projects to be financed.
